

9 June 1971

Hoosier Archives is a Diplomacy gamefile published by Walter Friedman, 411 E. 20th Avenue, Indiana 46032, telephone (317) 482-2824; Archives Director, Hoosier Diplomacy Congress and V-P/Treas., International Diplomacy Association. It is devoted to articles on good play, rating systems, analyzed demonstration games played to experts, such as the Old and New Lions Game (1971) now in progress, and game news. Information from my Diplomacy archives is vital for all this and is available to the public as well. Although the archives is virtually complete in as lesser extent form, missing well-analyzed originals are solicited, either for purchase or a loan to permit xeroxing. Many other short games are now available from the archives, more are solicited so as to make them available to others. A subscription to Hoosier Archives is \$5/\$2.00 or \$6/\$3.00 (inc. residents add 4% sales tax). Sets outside the U.S. are \$6/\$2.00 or \$6/\$3.00. Back issues are 30¢ apiece. This is Atlanta Press publication #126. Paid/total circulation this issue: 130/241

HOOSIER ARCHIVES DEMONSTRATION GAME (1971/81)
(The Old and New Lions Game)
winter 1971

FILE TO JOHN D. SIME BILLY

ALGERIA: builds A Thi, A Ind (Also has: A Vie, A Ser, 1 Ger)
(Luth)

ANTWERP: builds F lon, (Also has: F Ber, F Nth, A Nwy)
(Luth)

BRANKE: builds I Bre, A Tac. (Also has: A Ber, F Per, A Spa)
(Hosanna)

CHERRY: builds F Ber. (Also has: A Pub, A Kie, F Don)
(Luth)

ITALY: builds F Ber. (Also has: A Ven, A Tur, F Lon)
(Luth)

MEXICO: builds F Sic(oc), A Mex. Also has: F Ser, A War, A Rom, F Ser
(Hosanna)

TURKEY: builds F Ser. (Also has: F Nth, A Bul, A Ger)
(Luth)

Due to the Diplo, the next issue will be delayed one week. Spring 1971 issues are therefore due not later than noon (9:00 A.M. for phone calls) on Saturday, 6 June 1971. For players didn't submit confidential spring moves this time, probably due to the many variables during the first year.

It should be mentioned that 2 of the players have address changes effective immediately. They are: Mike Hosanna--121 E. Hickman Ave., Madisonfield, N.J. 08053 and Randy Lyman--4 General Delivery, Mahanoe, 12 Mendon Lodge, Ipswich, Mass. 01938.

Ken Laska asked that the following statement be published. I should say though that of the 3 players he mentioned, only mention for those presently using Hoosier Archives. Therefore, if mention turn down Laska's offer and Len doesn't get anyone else, John Verheiden's already moves will be used for Italy next time, Laska's message.

"I am being harassed by work for the Game Show and DiploCon, and also by some personal problems. Until the Show is over, I just can't give full attention to this game and there. I request that a substitute play the entire year of 1972 for me. A country that does not negotiate is doomed and it would be unfair to all of you, and the operators, to not use the game the attention it deserves. I prefer one of these players to turn over Laska's old files, change format of our, Newing, even in highly capable of keeping a consistent game, at the pace necessary for the game."

1. What is the purpose of the study?
 The purpose of the study is to investigate the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course.

1. The first of the above mentioned persons is a man of about 40 years of age, of medium height, dark hair, and a serious expression. He is a native of the United States, and has been in the service of the Government for many years. He is a member of the United States Army, and is currently assigned to the duty of a Major. He is a man of great intelligence and ability, and is well known for his loyalty and devotion to his country.

2. The second of the above mentioned persons is a woman of about 35 years of age, of medium height, and a serious expression. She is a native of the United States, and has been in the service of the Government for many years. She is a member of the United States Army, and is currently assigned to the duty of a Major. She is a woman of great intelligence and ability, and is well known for her loyalty and devotion to her country.

3. The third of the above mentioned persons is a man of about 45 years of age, of medium height, and a serious expression. He is a native of the United States, and has been in the service of the Government for many years. He is a member of the United States Army, and is currently assigned to the duty of a Major. He is a man of great intelligence and ability, and is well known for his loyalty and devotion to his country.

4. The fourth of the above mentioned persons is a woman of about 30 years of age, of medium height, and a serious expression. She is a native of the United States, and has been in the service of the Government for many years. She is a member of the United States Army, and is currently assigned to the duty of a Major. She is a woman of great intelligence and ability, and is well known for her loyalty and devotion to her country.

5. The fifth of the above mentioned persons is a man of about 40 years of age, of medium height, and a serious expression. He is a native of the United States, and has been in the service of the Government for many years. He is a member of the United States Army, and is currently assigned to the duty of a Major. He is a man of great intelligence and ability, and is well known for his loyalty and devotion to his country.

6. The sixth of the above mentioned persons is a woman of about 35 years of age, of medium height, and a serious expression. She is a native of the United States, and has been in the service of the Government for many years. She is a member of the United States Army, and is currently assigned to the duty of a Major. She is a woman of great intelligence and ability, and is well known for her loyalty and devotion to her country.

7. The seventh of the above mentioned persons is a man of about 45 years of age, of medium height, and a serious expression. He is a native of the United States, and has been in the service of the Government for many years. He is a member of the United States Army, and is currently assigned to the duty of a Major. He is a man of great intelligence and ability, and is well known for his loyalty and devotion to his country.

8. The eighth of the above mentioned persons is a woman of about 30 years of age, of medium height, and a serious expression. She is a native of the United States, and has been in the service of the Government for many years. She is a member of the United States Army, and is currently assigned to the duty of a Major. She is a woman of great intelligence and ability, and is well known for her loyalty and devotion to her country.

9. The ninth of the above mentioned persons is a man of about 40 years of age, of medium height, and a serious expression. He is a native of the United States, and has been in the service of the Government for many years. He is a member of the United States Army, and is currently assigned to the duty of a Major. He is a man of great intelligence and ability, and is well known for his loyalty and devotion to his country.

10. The tenth of the above mentioned persons is a woman of about 35 years of age, of medium height, and a serious expression. She is a native of the United States, and has been in the service of the Government for many years. She is a member of the United States Army, and is currently assigned to the duty of a Major. She is a woman of great intelligence and ability, and is well known for her loyalty and devotion to her country.

The US has not ruled. This is a case of Italian Naples is still the base of the fleet for the Italian Sea. Either it will move into the Persian Gulf or the Gulf of the Eastern Mediterranean or it will move into the Tyrrhenian Sea to defend the defense of Italy against possible French attack.

Vagie (Amoral) will build armor to batapost and Triemo. They will be kept in the bottom for km. Bulbas and the power to the east.

Beirut (Turkey) will build a fleet at Samsun. That is a defensive fleet to keep the Russians out of the Eastern Med and protect Turkey's own southern coast.

Nomadic (Russia) and Maritime to get sea routes. If we are to build both (which he doesn't have to do that will) they must be in Moscow and St. Petersburg. That means a Moscow will be sent southwest. The big question then for this winter is whether build to St. Petersburg (northern coast) means war with England. A factor on the south coast means war with Germany, something which Hiram would love to see, building a St. Petersburg term Hiram then Russia will be defensively neutral for the reason. In the same sense, if you is sent southwest if and when the English warms Hiram based on lines from, I believe that Hiram will play things cautiously and will build a St. Petersburg.

Verwarden could be a good way if Verwarden drops out altogether from the game. Verwarden will be a good replacement, but he will be faced with the immediate problem of a lack of diplomatic contacts within the game. Verwarden has Russia, the United States, and China. There may be a possibility of a deal with the Soviet Union, but it is not a given. The Soviet Union is a very strong country, and it is not clear if Verwarden can handle it. Verwarden will have to be very careful in dealing with the Soviet Union, and he will have to be very careful in dealing with the United States and China. Verwarden will have to be very careful in dealing with all three of these countries, and he will have to be very careful in dealing with the game as a whole.

Walter, an ex-convict (England) who had been found guilty of an offence in London, and who had stolen a large land was in Germany. A French nobleman and his wife were in England and he was in the neighbourhood of the prison. My father was then for will to go to the prison.

SECRET - ROK THE CODE - 12164

On September 17, December 1971, it was announced today that the Man Mohan, former headquarter of the Indian Home of the Imperial Order, was released half an hour after was recently placed on the Criminal List of Madras High Court. The Home and High Court had been earlier after reading the latest news release from Edinburgh.

surface being placed in contact, the newly exposed metal was found to form "black scale" formation. I was born a little later in the same place (New York City) and as soon as I began to remember (thanks to Melvin Kaplan) the details of reading and descriptions of these deposits, I was able to identify them as "black" which was undoubtedly the same as the "black" that was found on the surface of the metal.

"Will the vessel in the dock and also my unknowns for while. I guarantee my satisfaction and completion!"

On the verge of lapsing into a coma, the distraught clerk was rushed upstairs to the Intensive Care Unit.

ZURICH (NZZ) (2 November 1901): Latest updated odds on the war currently raging in Europe are as follows: Russia 2.9 to 1 against, Austria 5.3 to 1, France 5.6 to 1, England 7.6 to 1, Germany 8.2 to 1, Turkey 11.6 to 1 and Italy remains the delinquent at 9 to 1 against. Stay tuned for further developments.

HARAR: MIA! DOWN (28 December 1901) (A Novi Sodom-Flossieland): Albeit infected by a spore of dyspepsia, Pope Joan the Indomitable has reappeared for the first time in many a fortnight to cast her eyes o'er the lands of strife and war, and issue her usual magnificent pronouncement to the proceedings which seem to be wafting one more time through the pages of neutral journals from Haykjavik to Lebanon, chronicling myriad events of the petty inter-ethnic love-hate of the seven current bughers purporting to equal the thrones of the Great Powers of Europe, as per the edicts handed down in the reign of al-lah, and developing some of the most esoteric signs of intractable vantage heretofore seen on the horizons of the lives we lead in this never-ending battle for truth, justice and the liberty of subjugation of those to whom it seems to drive the boats of fate, as scripted by the usual source, and presume to manage their limited affairs in a manner befitting only the most salubrious of intelligences, which is just about par for this course, if I do say so myself, which of course I do, in my usual stereotypically self-flattering high-pitched shriek of ecstatic rapture engendered by the insouciance of exceptional and putrescently phallic assertions of outrances into the glacial cautions of the bedfellow who is revised-golden-ruling you, clavering onces singing songs of staid and staid in your own available underbelly, whichever of the numerous physiological elements of your person you have selected this week as the lucky recipient of the First of March awarded each year to the monthly champion in each day's continental war-off the hour, who is, at least this time, as if it weren't always, and I assure you, though I don't have to, Lord knows, I think, under the circumstances notwithstanding, yes.

Forward, Christian soldiers, marching as to glory...

INTO THE ARCHIVES NO. 65

To present an interesting combination this time. First we have an article by one of our newer players on how Scandinavia affects the board, and second we have an update on Jeffrey Marshall's "Diplomacy USA." The hobby's numbers taker, Ray Powers, has still managed to stay ahead of his, however, as we now have over 1000 players in the hobby. Some of the foreign countries in particular have totals that are too low in Jeff's article: Australia, Britain, Italy and North Africa.

SCANDINAVIA, ENGLAND'S SPANISH ISLAND, OR AN ISLAND WITHIN ENGLAND

by Howard Mankin

Scandinavia, which for the purposes of this article will mean Denmark, Norway, Sweden, Finland and St. Petersburg is especially valuable to England. There's the obvious fact of the four centers all open to naval attack. Even better, they can be defended from land attack with only three units, thereby freeing one unit for duty elsewhere. If St. Petersburg out of Russian hands, the threat of fleets attacking England from coast flank is ended.

England's main adversary is usually Russia, but Scandinavia affects every country on the board. Germany has trouble finding units to commit up there, but if either of the other two becomes dominant in north Germany can be in trouble. Therefore, Germany is often to promote a stalemate. To France, Scandinavia is a welcome jewel to have agitated away from him. However, France may suddenly find England a little too strong for comfort, not to mention that Scandinavia can also be the basis of a German-French alliance. When France, Austria, and Italy look at Scandinavia, they see a viable and valuable group of four centers which have their chance for a strategic victory.

It is not a time to tip for Scandinavia with or without research, though still

- 4 - % of total publishers

- 5 - U.S. areas - % of U.S. people
- Foreign areas - % of foreign people
- 6 - U.S. areas - % of U.S. publishers
- Foreign areas - % of foreign publishers
- 7 - People/publisher ratio

The Northwest sector consists of all the states north of Virginia and west of Ohio, including West Virginia. The South is made up of all the states south of Virginia, Tennessee, and Oklahoma, including Virginia and Texas. Anything west of Texas, Kansas, Nebraska, and the Dakotas, including Alaska and Hawaii, are in the West, and the rest of the states make up the Central area.

The percentage of total people has somewhat shifted over to the foreign countries since we last published. It is a matter of fact that we were not happy with the results in a certain kind of interest abroad. The reason is that I had no "foreign" people to work on instead of scattered mailing lists, as I did in my last article.

California once again places first as with the people and publisher lists, and placed three cities in the local lists for people and publishers.

U.S. States		States	
	No. of people		No. of publishers
California	25	California	15

THE

1. **CONSTRUCTION** - The construction of a new building is a complex process that involves many different steps. The first step is to design the building, which involves creating a set of plans that show the layout of the building and the location of the various rooms and corridors.

2. **THE FUNDING** - The funding of a project is a critical step in the construction process. It involves raising the money that will be used to pay for the construction of the building. This can be done in a number of ways, including through the sale of bonds, the issuance of shares, or the receipt of donations.

3. **CONSTRUCTION** - The construction of a building is a complex process that involves many different steps. The first step is to design the building, which involves creating a set of plans that show the layout of the building and the location of the various rooms and corridors.

Not to be published by staff members and can be obtained only from HQ.

As the result of the calculation, the BRM rating lists players in a particular order determined from the formula $R = \mu + (W/N)(A - \mu)$. R is the number of completed regular season league games for which that player is the player of the game. A is the cumulative score in points from those R games. In each game a player receives 1 point for every player having done worse than he and gives one point to every player having done better. Players having done equally well exchange no points. Furthermore, no players are entered as referees who have received no points. In the order of supply, substitutes, elimination according to the season and year number, the first 100 players of the BRM (including players in 1st and 2nd year) are listed. Therefore it is a fraction of a point which the player on average has contributed per opponent in his games. The term $(1 - \mu)$ is a correction to balance the wide variances characteristic of the average score of a player rated on the basis of only one game. It appears that as N increases, dropping out of the list of players of a given year is a good thing in the BRM player rating. The terms W and N in the last term are represented the percentage factor, i.e. the number of wins.

When a strategy is played by one of many replacement players, the player is deemed to be substituted in the following way: Any move that move is credited to the original player and every other move is credited to the latest replacement player of that player. A score of 1, 0 or -1 is given to the latest replacement player when each move is made unless otherwise is given to the original player.

None of the flights are included in this listing, as the text of a. is unclear. The flights are available, and I depend on you to provide information leading to the flight's correction and improvement.

CONFIDENTIAL - SECURITY INFORMATION

1. Source: Leakage from press - not the official press release to media from the press office of the company in question on the date of the leak

Instructions: Make a list of all negatives you have actually seen within the last month. Not each one goes in the following categories as applicable.

- (1) Physical Qualities: (A) High School, (B) Low School
(2) Ability and Interest in work and business, (A) High, (B) Low
of the following: (A) High, (B) Low
of the following: (A) High, (B) Low
of the following: (A) High, (B) Low

(1) Mastering - 10, high 9's, low 8's only those gamblers who have played in or followed closely in the past 12 months. Please, to not use your own scores to give a rating to yourself.

10. Overall quality. If, with a few (there is a possibility of all) items, you are left with a general opinion of how well you like the store.

DOES THIS APPLY TO YOU?

1. Please accept this sample copy in lieu of a personal answer to your inquiry about postal Diplomacy. Time pressure forces us to do this, but we think you'll find Hoosier Archive is a good introduction to the hobby.
2. We hope you enjoy this sample copy. We solicit your subscription.
3. We understand you have started a Diplomacy zine. We solicit a trade with you so we can keep the archive complete, thus providing a vital service for the Diplomacy community. In fact, two copies of each of your issues would be appreciated so as to have a spare for the archives.
4. Welcome aboard. We are happy to have your subscription which is good through issue # _____.
5. This is your last/next-to-last issue. We hope you will renew your subscription.

THE MCCALLUM SYSTEM OF NOTATION

For ease in following the current demonstration game, a Diplomacy map is reproduced on the reverse side by permission of John Moot, the President of GRI. Incidentally, DIPLOMACY is a registered trademark for a game invented by Allan B. Calhamer and copyrighted by Games Research Inc., 500 Harrison Avenue, Boston, Mass. 02118. GRI sells the game for \$8.95 and the 1971 Rulebook for \$1.

To best follow the game and hopefully learn something from it, since it is being played and analyzed by experts, I would like to suggest to you the use of a recording system that was first proposed to me by John McCallum.

First of all, you will need seven crayons in the following colors: red (Austria), purple (England), blue (France), black (Germany), green (Italy), brown (Russia), and yellow (Turkey).

Now to use the McCallum system, you take this map, which is provided with each of the spring and fall seasons, and record the armies with a circle of the appropriate color and the fleets with a line. For the winter season, simply take the fall map and make square brackets around a unit built and round brackets around a unit removed.

Also, a good way to go from one season to another is to indicate an attack with an arrow and a support with a line and bar as illustrated. Additionally, an unsuccessful order or retreat can be indicated by a dotted line.
